

Junior Boiler/Burner Field Service Technician

SUMMARY OF JOB RESPONSIBILITIES:

Analytical and Combustion Systems (ACS), based in New Milford Connecticut, has an opening for a full time Junior Boiler / Burner Service Technician. This position requires field service on commercial and industrial boiler and burner systems in New York, Connecticut, and New Jersey with the majority of the work being in New York City. This includes gaseous and liquid fuel combustion optimization and testing, full combustion systems commissioning and set up on various boiler and burner manufacturers along with in depth knowledge of all combustion analyzing equipment.

The primary job responsibility after the training period will be to support our senior service staff, along with principle product installation and start up and to perform commissioning and troubleshooting of our principle product lines. Work will also include ACS general service support.

JOB DUTIES:

Desirable candidate should possess:

- Maintaining a positive attitude and desire to be part of ACS' winning and prosperous team, including ensuring our customers satisfaction.
- Initial knowledge of industrial/commercial steam and hot water boilers, boiler room operation, and auxiliary equipment.
- Initial knowledge of retrofit, repair and startup of boilers, burners, and accessories, utilizing knowledge of steam and hot water theory, pipe fitting, and mechanical layouts.
- Familiar with all forms of flame safeguards and the use testing equipment and other troubleshooting tools.
- Familiar with calibration, repair, and adjustment of associated controls.
- Assist Senior staff with performing preventative maintenance, site surveys, replacement, and modifications to customer's equipment.
- Prepare for new equipment commissioning and repairs by examining equipment, anticipating difficulties, gathering materials, and coordinating on-site work
- Communicate both professionally and effectively with personnel ranging from plant managers to skilled labor
